Seems to me the way to get around this fascistic DC Court is to say to them you cannot criticize the means by which we derive competition when it comes to unes if you do not also object to it when we use it to grant Id to the Bells.

So your immediate action should be to take away from the Bells long distance because of the DC Court ruling. QED. Res ipso loquitur. Whats good for the goose is good for the gander. You will have to find words to make a dent in the miscreants skulls.
